

Edible Space Adventure!

Our brilliant Class 4 & Class 5 students turned learning into a flavorful journey with the Edible Space Activity!

From delicious rockets to tasty planets and sweet satellites, every creation showcased their creativity, teamwork, and curiosity about the universe.

The activity was not just about fun—it helped students understand space concepts in a hands-on way, making learning memorable and exciting. By combining science with art (and taste!), our young explorers discovered that knowledge can be enjoyed with both the mind and the heart. Truly, it was an out-of-this-world experience for all!
