

Micro Teaching Session- Sense Organs

Vishwa Bharti Public School, Ghaziabad

The Pre-Primary teachers of Vishwa Bharti Public School, Ghaziabad, recently conducted an enriching Micro Teaching Session on the topic "Sense Organs", using the Experiential Learning Approach.

The session was thoughtfully designed to make learning joyful, interactive, and age-appropriate for young learners. Through a variety of innovative strategies, the educators demonstrated how to effectively integrate songs, games, and creative hands-on activities to help children explore and understand the five sense organs in a fun and meaningful way.

This initiative not only provided a platform for teachers to refine and enhance their instructional techniques but also reflected the school's ongoing commitment to progressive pedagogy and the holistic development of its students.

The Micro Teaching Session encouraged collaborative learning, promoted peer feedback, and fostered a spirit of continuous improvement in classroom practices. It served as an excellent example of how reflective teaching can lead to better engagement and deeper learning outcomes for students.
