

Excursion to the National Science Centre

A Day of Fun, Laughter and Learning – Excursion to the National Science Centre

Excursions are not just about travel, they are journeys of holistic development where students learn, explore, bond and create memories together.

On 23rd August 2025, the students of Classes VI to X visited the National Science Centre, Delhi, where they experienced a perfect blend of learning, fun and laughter. From exploring India's scientific heritage and meeting life-sized dinosaurs to discovering the wonders of the human body, experimenting with exciting illusions, and stepping into the world of AI, robotics and nuclear power, every gallery offered something new and inspiring. The joy of sharing delicious food with friends added to the excitement, making the excursion not just an educational trip but also a day filled with bonding, smiles and unforgettable memories.
